

Plastic Mopping Hardware

Autoclavable buckets, carts, and accessories

Description

Contec offers a variety of mopping system components such as buckets, carts, and wringer sieves made from a unique polypropylene copolymer that is both durable and autoclavable. Carts, and some buckets, include caster wheel assemblies. All components listed may be sterilized by autoclave or gamma irradiation.

Features and Benefits

- Durable and lightweight plastic components
- Autoclavable at 122° C for up to one hour
- Compatible with all common disinfectant solutions and most common solvents
- Color-coded (blue & red) buckets for easy identification

Applicability

The information presented here is applicable to the part numbers shown below, as well as to any product containing the same materials and produced under the same conditions, regardless of product size or packaging configuration. Please contact a Contec sales representative for more details.
