

# PROSAT® Wipe, Polywipe-C

Polywipe-C wipes with 100% IPA

## Description

The Polywipe-C wipe is a lightweight wipe with a textured surface for effective cleaning. It is made from 100% textured polyester knitted fabric with LASER sealed edges. The sealed edge wipes are laundered and saturated in an ISO Class 4 environment for the lowest levels of particles, fibers, and extractable residue. Presaturation of the wipes greatly reduces solvent usage and maximizes process control and consistency.

## Features and Benefits

- Extremely low in both particles and fibers
- Abrasion and chemical resistant
- Ideal for both general and critical cleaning
- Controlled saturation level greatly reduces solvent usage and waste
- Reduces VOC's associated with IPA
- Consistent saturation maximizes process control and efficiency

## Applicability

The information presented here is applicable to the part numbers shown below, as well as to any product containing the same materials and produced under the same conditions, regardless of product size or packaging configuration. Please contact a Contec sales representative for more details.
