

QuickConnect™ Mop Handles, Autoclavable

Autoclavable mop handles for all mopping systems with QuickConnect head frames

Description

The autoclavable mop handle include telescoping and fixed-length styles, all used with Contec's QuickConnect head frames for a variety of mopping systems. Telescoping handles consist of tubes that adjust to any length within the range of the handle. Fixed-length handles are economical and simple to use, while adjustable length handles enable easy cleaning of areas that are beyond the reach of fixed-length handles. All of the handles listed may be sterilized by most common methods including gamma irradiation, ethylene oxide, or autoclave.

Features and Benefits

- Aluminum handles are lightweight and economical
- Stainless steel handles are durable and mechanically polished
- Telescoping handles make it easy to reach high surfaces such as walls and ceilings
- Locking-collar adjustment for any variety of handle lengths
- Locking collars are made of 100% pure Delrin® (acetal) resin
- Used with all Edgeless®, VertiKlean®, VertiKlean® MAX™ and EasyCurve™ systems

Applicability

The information presented here is applicable to the part numbers shown below, as well as to any product containing the same materials and produced under the same conditions, regardless of product size or packaging configuration. Please contact a Contec sales representative for more details.

See part numbers listed under "Technical Data"

Notes:

- 1) Data shown are typical values and should not be used as product specifications.
- 2) Valid product comparisons may only be obtained through side-by-side testing in the same test facility, under similar conditions.
- 3) Current and/or comparison data may be available. Please contact a Contec sales representative for details.
