

CONSTIX[®] Swab, SF-13

Sealed foam swab, small pointed tip head

Description

CONSTIX SF-13 swab consists of 100 PPI open-cell foam tightly sealed about the tip of a glass-filled polypropylene toothpick. The foam is secured to the handle without the use of adhesives or binders. The foam head conforms tightly to the pointed shape of the swab handle to provide a very fine tip.

The polyurethane foam head provides good particle entrapment and removal. The absorbent foam enables solvents, such as isopropanol and ethanol, to be readily sorbed for applications involving solvent delivery or removal.

Features and Benefits

- Excellent particle and entrapment and retention
- Enables access to very small areas and crevices
- Compatible and sorbent with most common solvents
- Very low in particles and fibers

Technical Data

Swab head material	100 PPI open-cell polyurethane foam
Swab handle material	Polypropylene, glass filled
Construction	Sealed foam over glass/polypropylene applicator

Attribute; (units)	Value	Test Method
Non-volatile residue, NVR	N/A	
In deionized water; (mg/swab)	N/A	
In isopropanol; (mg/swab)	N/A	
Particles ≥ 0.5µm; (per swab)	N/A	
Fibers > 100µm; (per swab)	N/A	
Surface resistivity of handle; (x 10 ⁸ ohms/sq)	N/A	

Notes:

- 1) Data shown are typical values and should not be used as product specifications.
- 2) Valid product comparisons may only be obtained through side-by-side testing in the same test facility, under similar conditions.
- 3) Current and/or comparison data may be available. Please contact a Contec sales representative for details.
