

# CONSTIX<sup>®</sup> Swab, SF-17

Sealed foam swab, cotton-tipped applicator

## Description

The SF-17 is a sealed foam swab consisting of a foam head formed over the cotton bud of a 6" cotton-tipped applicator with wood handle.

The polyurethane foam head provides good particles entrapment and removal. The absorbent foam enables solvents, such as isopropanol and ethanol, to be readily sorbed for applications involving solvent delivery and removal. No adhesives are used and the wood handle is stiff enough to allow vigorous swabbing. The SF-17 is very absorbent and resistant to most solvents except ketones.

## Features and Benefits

- Soft, absorbent foam/cotton head
- Wood handle is stiff and solvent resistant
- Excellent for particle removal
- Well suited to applying solutions and adhesives
- Very low in particles and fibers

## Technical Data

Swab head material	100 PPI open-cell polyurethane foam
Swab handle material	Birch hardwood
Construction	Sealed foam over cotton-tipped applicator (CTA)

Attribute; (units)	Value	Test Method
Non-volatile residue, NVR		
In deionized water; (mg/swab)	N/A	
In isopropanol; (mg/swab)	N/A	
Particles ≥ 0.5µm; (per swab)	N/A	
Fibers > 100µm; (per swab)	N/A	
Surface resistivity of handle; (x 10 <sup>8</sup> ohms/sq)	N/A	

### Notes:

- 1) Data shown are typical values and should not be used as product specifications.
- 2) Valid product comparisons may only be obtained through side-by-side testing in the same test facility, under similar conditions.
- 3) Current and/or comparison data may be available. Please contact a Contec sales representative for details.
