

Amplitude™ EcoCloth™ Cleanroom Wipes

Meeting the Challenge

Contec®, the leader in developing innovative products, is pleased to introduce a new nonwoven wipe. The EcoCloth™ wipe has been engineered to have greater thickness in a lighter weight sheet. The increase in thickness greatly enhances the sorbent capacity (fewer wipes are required to pick-up spills) and also makes it easier for operators to pick up one wipe at a time.

Our engineers also kept Mother Earth in mind when developing the Amplitude EcoCloth wipe. Today's customers are looking for ways to reduce their solid waste disposal — for both financial and “eco” reasons. The combined effect of superior performance and lighter weight gives a potential reduction in wipe solid waste in excess of 40% (based on the dry weight of wipes disposed).

Features of EcoCloth Wipes

- Hydroentangled nonwoven wipe composed of a polyester/cellulose blend
- Low levels of particles and extractables
- Superior sorbency
- Greater thickness reduces operator waste
- Users can easily lift one wipe at a time
- Reduces solid waste in excess of 40%
- First wipe designed for the Cleanroom industry with Mother Earth in mind

Amplitude™ EcoCloth™ Nonwoven Cleanroom wipes are manufactured using a special hydroentangling process. They are engineered to have greater thickness in a lighter weight sheet, requiring fewer wipes for spill pick ups.
