

Contec® Compact Bucket System

Versatile multiple bucket system for use with Contec's flat and curved mops

Contec's autoclavable Compact Bucket System is an all-in-one solution to make cleaning and disinfecting easier and more efficient. The cart is designed for use with Contec mops such as the VertiKlean MAX, VertiKlean MAX Sealed Edge, EasyCurve and QuickTask Mopping Systems.

The stainless steel trolley is available in multiple configurations to meet the unique needs of your environment. Available with either two or three, autoclavable polypropylene buckets, or with three stainless steel buckets, and a choice of a standard or a utility trolley handle. The utility handle allows two small buckets (6L) or one large bucket (15L) to be positioned on the handle providing additional storage for extra supplies such as clean mop heads, spray bottles, wipes, and other items as needed.

The trolley frame has a mop head removal tool on the front for easy removal of a VertiKlean MAX or VertiKlean MAX Sealed Edge mop head. An optional hands-free removal tool is also available. Two mop holders with handle clasps on either side of the cart allow for convenient mop storage during transport and storage.

The clean polypropylene buckets are provided with stainless steel debris screens. The screen is positioned in the base of the clean and rinse buckets and prevents the mop from touching the bottom of the bucket where unwanted contaminants settle.

Compact Triple Bucket System with Utility handle (2940U3B)

Compact Double Bucket System with Utility handle (2940U2B)

Compact Triple Bucket System with Standard handle (2940P3S)

Mop head removal tool

Mop holder
