

Compact Bucket Systems

Contec's autoclavable Compact Bucket System is an all-in-one solution to make cleaning and disinfecting easier and more efficient.

The stainless steel cart is available in multiple configurations to meet the unique needs of your environment. Available with either two or three autoclavable polypropylene buckets and a choice of a standard or utility cart handle. The utility handle allows two small buckets (1.6 gallon) or one large bucket (3.9 gallon) to be positioned on the handle providing additional storage for extra supplies such as clean mop heads, solution spray bottles, wipes, and other items as needed.

A stainless steel system is also available, 2940P3S. The three bucket autoclavable system has a standard handle.

The cart frame has a removal tool on the front for easy, hands-free removal of a VertiKlean® MAX™ or VertiKlean® MAX™ Sealed Edge mop head. Two mop holders with handle clasps on either side of the cart allow for convenient mop storage during transport and storage.

Features	Benefits
QuickConnect stainless steel, anodized aluminum and fiberglass handles are available in several lengths	<ul style="list-style-type: none"> • For a variety of cleaning tasks
Cost-effective solution	<ul style="list-style-type: none"> • One handle can be used with all Contec mop frames
