

# Edgeless<sup>®</sup> Mop

Edgeless<sup>®</sup> Mops are made from strong, durable knitted polyester, eliminating contamination from breakage and deterioration common with cotton and rayon string mops. Cleanroom laundered Edgeless Mops are made from a continuous tube of 100% polyester knitted fabric looped to form mop strands that will not shed or break.

Patented Textured and Long Textured Edgeless Mops feature unique ribbed, twisted strands that are more sorbent than traditional string mops and have a textured head band that is ideal when additional abrasion resistance is required.

All mops are available sterilized by gamma radiation, and can be autoclaved. Validated sterile to a 10<sup>-6</sup> SAL per ANSI/AAMI/ISO 11137 guidelines. Certificates of sterility are available.

## Notes

- The data shown are typical values and should not be used as product specifications.
- Valid product comparisons may only be obtained through side-by-side testing in the same test facility, under similar conditions.
- Current and/or comparison data may be available. Please contact a Contec sales representative for details.
- CTM – Refers to Contec Test Method
- Mop Coverage data is based on mop head applying solution such that the mopped surface is visibly wetted across the full mop path with no dry streaking observed, under controlled conditions. It is the responsibility of the user to determine appropriate coverage to ensure surfaces are visibly wet for the contact time required for their specific solution.
