

# Stainless Steel Mop Frames

The autoclavable frames for Contec's VertiKlean® and VertiKlean® MAX™ mop heads are lightweight, durable and are made of stainless steel providing chemical compatibility.

The frames easily attach to both the VertiKlean and VertiKlean MAX mopping systems. Note that the frames 2651K, 2651KLF, and 2652K, that feature keepers to affix wipes around the mop, are not compatible with the original T-slot VertiKlean mops. The mop head frames feature the QuickConnect™ handle adapter which enables use with the wide variety of Contec QuickConnect telescoping and fixed length handles.

All of the mop frames listed may be sterilized by most common methods including gamma irradiation, ethylene oxide, or autoclave (recommended cycle 121°C for 30 minutes).
