

Edgeless[®] Mop

16oz Polyester knitted tube mop

Edgeless Mops are made from strong, durable knitted polyester, eliminating contamination from breakage and deterioration common with cotton and rayon string mops. Cleanroom laundered Edgeless Mops are made from a continuous tube of 100% polyester knitted fabric looped to form tubular mop strands that will not shed or break.

Designed for use with aqueous solutions containing cleaning agents and disinfectants, Edgeless Mops are compatible with a wide range of chemicals. These mops work well with existing string mop hardware; however, we highly recommend a down-press wringer for proper liquid extraction.

Mops are laundered and packaged in an ISO Class 4 Cleanroom. Edgeless Mops are available in textured versions.

Designed for semiconductor, pharmaceutical, biotech and medical device industries for lab and process area cleaning. Recommended autoclave cycle is 121 °C for 30 minutes.
