

Product Recommendations for Lab Animal Sciences

Clean counts most

Product Recommendations for Large Animal Facilities

Process improvement is our number one goal.

Who we are: For more than 30 years, Contec has been developing innovative cleaning and disinfection tools for the most critical environments from pharmaceutical and medical device manufacturing to cleaning the most critical environments in acute care facilities. Having the proper tools for cleaning and disinfecting is a major component of mitigating risk and improving outcomes. Contec's Lab Animal Sciences portfolio incorporates our best and most efficient products and technologies into a complete system of solutions for cleaning and disinfecting large animal facilities. With our own manufacturing and distribution centers here in the USA and abroad, we have uninterrupted flow of inventory and no need to wait on containers from other companies in Asia. Contec partners with several local vendors offering unique tools to improve process outcomes.

Contamination Control Tools by Process:

Room Cleaning

Peroxigard®

Peroxigard is ideal for safe, effective and quick disinfection.

Peroxigard can be used to foam cages, mop floors, clean and disinfect other areas and equipment within the facility.

When used with the Foamit mobile on-board battery-operated unit, stacked cages can be foamed in a matter of minutes, saving on labor.

Floors/Cages

String Mop

Use the string mop for larger footprint areas. It is designed like a string mop. However, it is not cotton. Therefore, it has none of the issues that traditional cotton mops have.

The mop is made from a continuous tube of 100% polyester knitted fabric looped to form mop strands that will not shed or break.

Premira® Portables™

Premira Portables is a resealable pouch that contains ten dry Premira mop pads which can be saturated on demand.

Simply pour the chosen chemistry directly over the dry pads in the pouch and write the chemistry and date on the convenient label – no buckets, no hassles!

The pouch can be resealed and easily carried from room to room, with less mess.

Scrub Sponge

For difficult, dried-on debris, the Contec Professional Scrub Sponge in conjunction with the ZeroGravity™ Handle and blue ZeroGravity™ frame, provides an easy solution to removal of any debris that is difficult to remove from floors or cages.

Above Floor Cleaning

ContecClean™ Cloth

ContecClean™ Cloth comes in a variety of sizes and is ideal for all surfaces.

Peroxigard RTU

You can use the Peroxigard RTU wipe as a one-step convenient way to clean and disinfect all types of surfaces.

TuffStuff™

TuffStuff™ also provides convenient easy to use wipers that can be placed in any location within the room.

High Areas

High Duster XF

Contec's patented, unique High Duster XF can be used to clean and disinfect high and hard to reach areas.

Use with ZeroGravity™ QuickChange handles to clean around airlines, ducts, and other difficult spots.

Hallways

Premira® Mop Pad

For shorter hallways, Premira® mop pads are ideal for cleaning and disinfecting while larger hallways call for the EL Mop!

Edgeless® Floor Mop

Patented textured edgeless mops feature unique ribbed, twisted strands that are more sorbent than traditional string mops and have a textured head band that is ideal when additional abrasion resistance is required.

All Areas

Toolflex One™

Toolflex One™ is the ultimate, most versatile, wall mounted tool holder system to effectively organize, efficiently store and quickly access a wide variety of tools of different sizes, shapes, and contours.

Uses FDA compliant food-contact material, the system can be cleaned-in-place or holders can be removed for cleaning in a cage washer or autoclave machine.

8 distinct color-coded options available.
