

Amplitude™ EcoCloth Wipes

Cellulose/polyester cleanroom wipes

Contec®, the leader in developing innovative products, is pleased to introduce a nonwoven wipe. The EcoCloth™ wipe has been engineered to have greater thickness in a lighter weight sheet. The increase in thickness greatly enhances the sorbent capacity (fewer wipes are required to pick-up spills) and also makes it easier for operators to pick up one wipe at a time.

Our engineers also kept Mother Earth in mind when developing the Amplitude EcoCloth wipe. Today's customers are looking for ways to reduce their solid waste disposal — for both financial and “eco” reasons. The combined effect of superior performance and lighter weight gives a potential reduction in wipe solid waste in excess of 40% (based on the dry weight of wipes disposed).

Amplitude™ EcoCloth™ Nonwoven Cleanroom wipes are manufactured using a special hydroentangling process. They are engineered to have greater thickness in a lighter weight sheet, requiring fewer wipes for spill pick ups.
