

High Res Mop™

featuring Premira® Microfiber

For wall and ceiling cleaning

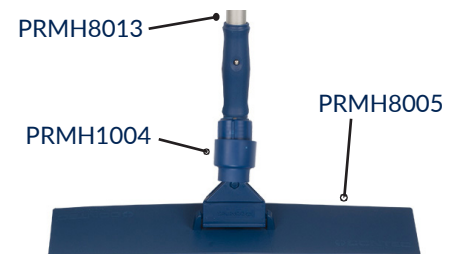

High Res Mop™ featuring Premira® Microfiber incorporates a layer of hydrophilic foam, allowing the distribution of larger amounts of fluid. An absorbent foam core helps reduce the risks of dripping and splashing, reducing waste and occupational exposure to contaminants and chemicals. For use with the ZeroGravity™ and ZeroGravity™ QuickChange hardware. Also compatible with your existing hardware.

ZeroGravity™ Mop Frame

Even and consistent cleaning

Paired with our single-use Premira® mops, this lightweight tool is 100% recyclable. The ZeroGravity™ mop frame ensures that the mop pad is applied with consistent pressure for even cleaning and uniform application of chemistry.

PRMM3001

Features

- Helps eliminate cross-contamination risk
- Compatible with bleach, quat, and peroxide-based chemistries
- Excellent sorbent capacity reduces drip risk
- Perfect for cleaning walls, vertical surfaces and ceilings
