

ZeroGravity™ Mopping System

Lightweight yet sturdy, designed for all surfaces

The ZeroGravity™ mopping system by Contec Professional is a unique concept in cleaning. The incredibly lightweight handle and frame offer an ergonomically friendly alternative to traditional mops. When combined with the Premira® Microfiber Mop Pad, mopping becomes faster and more compliant.

The ZeroGravity™ Mop Frame features a uniquely curved shape. This helps ensure the entire mop pad is used, instead of just the edges, as with typical mops. Also, it is 100% recyclable and has a low profile, making cleaning under objects, furniture, and equipment easier than ever. The ZeroGravity™ aluminum handles are strong, durable, and available in a variety of lengths—ready for use in most cleaning applications. The ZeroGravity™ Mopping System is ideal for any facility, providing outstanding results and exceptional value.

CURVED FRAME FOR EVEN PRESSURE

The ZeroGravity™ Mopping System is engineered to help cleaning teams and EVS staff work more effectively. The innovative curved shape of the ZeroGravity Mop Frame flexes to flatten completely when normal cleaning pressure is applied. This results in more evenly distributed cleaning power and more efficient use of mop pads.

Features

ZeroGravity™ Mop Frame is 100% recyclable polypropylene

Curved profile enables use of the entire mop for better overall value

Lightweight design helps reduce operator strain compared to traditional mops

Part No.	Description	Size	Packaging
PRMH8005	ZeroGravity Mop Frame, blue	17.5" (44.5 cm)	6/case
PRMH8001	ZeroGravity Telescoping Aluminum Handle	56" - 100" (142 - 254 cm)	1/case
PRMH8002	ZeroGravity Aluminum Handle	58" (147 cm)	1/case
PRMH8003	ZeroGravity Aluminum Handle	20" (51 cm)	1/case
PRMH8004	ZeroGravity Telescoping Aluminum Handle	38" - 68" (97 - 173 cm)	1/case
