

SureFlex™ Flexible Mopping System

Designed to clean sensitive, curved equipment and surfaces

Contec Professional's SureFlex™ mopping system is an innovative solution to the unique cleaning challenges of healthcare settings. With a nonferrous aluminum handle and plastic mop frame, the system can be used safely around sensitive imaging hardware. The flexibility of the TPE (thermoplastic elastomer) mop frame allows it to conform neatly to the concave surfaces of large medical and processing equipment, as well as coved flooring installations.

The SureFlex™ mop frame paired with the single-use Premira® II microfiber mop pad offers the superior cleaning benefits of microfiber technology in an affordable, simple format. The disposable pad works effectively as a dry duster or with your choice of chemistry or cleaners.

PLIABLE FRAME CONFORMS TO CURVES

Eliminates awkward cleaning by hand
The flexible TPE mop head of the SureFlex™ mopping system allows it to clean the curved surfaces that traditional mops can't touch. SureFlex also eliminates the need for cleaning hard-to-reach areas by hand, providing a more consistent and efficient clean. The nonferrous handle is lightweight and available in multiple lengths, making the SureFlex mop an ideal choice for sensitive medical equipment and other large containers.

Features

Flexible mop head conforms to curved surfaces

Nonferrous hardware can be used around MRIs and magnetic sources

Single-use microfiber provides consistently better cleaning vs. laundered

Part No.	Description	Size	Packaging
2706H	SureFlex™ Flexible Mop Frame, Blue TPE With Hook	15" (38 cm)	1/case
